THE HUNTINGTON

## About the Huntington

The Huntington Library, Art Museum, and Botanical Gardens is a multi-disciplinary, collections-based research and education center founded by Henry and Arabella Huntington in 1919. Today, The Huntington is the most heavily used independent research library outside of the Library of Congress and one of the most-visited cultural institutions in Los Angeles County. The Huntington estate encompasses 207 acres and includes: The Huntington Art Gallery, the Huntingtons' original residence built in 1911; the newly expanded 45,000-square-foot Virginia Steele Scott Galleries of American Art; the MaryLou and George Boone Gallery, which houses special exhibitions; the original 1919 Library, with major additions that include a public exhibition hall and research complex; and 120 acres of botanical gardens landscaped into a dozen themed areas. The Huntington's mission is to share our world-renowned collections to support scholarship, foster learning, inspire creativity, and offer transformative experiences for diverse audiences.
