

Slide Making

Algae slides

1. Put algae sample on clean dimple slide.
2. Hold cover-slip at 45° angle, against edge of the water. Drop other edge of cover-slip.
3. Seal edges of cover-slip with Vaseline.

Stomata slides

1. Put leaf square on clean dimple slide. Put a few drops of plain water on top.
2. Hold cover-slip at 45° angle, against edge of the water. Drop other edge of cover-slip.
3. Seal edges of cover-slip with Vaseline.
